DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1) The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 2) Claims 73 – 144 are rejected under 35 U.S.C. 103(a) as being unpatentable over Zhang '733, '360, or '426 in view of Yamazaki '636.

The previous rejection still applies. The new limitations do not structurally distinguish over the prior art where in Zhang '426 a field mobility of a NOS transistor is disclosed. The particular field mobility of a NOS transistor claimed is inherent in the prior art or would have been routine experimentation for one of ordinary skill seeking to maximize device function.

Response to Arguments

- 3) Applicant's arguments filed 4-30-2001 have been fully considered but they are not persuasive. Applicant's arguments regarding the field mobility of a NOS transistor are unconvincing in view of the teachings of Zhang who specifically teaches similar field mobilities which are of the same order of magnitude to the field mobilities claimed. Applicant's arguments are unconvincing over the teachings and suggestions of the applied art.

Conclusion

- 4) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamazaki et al. (6169292) discloses thin film transistors.
